

NETWORKING & SYSTEM ADMINISTRATION LAB**Name: Swetha Prakash****Roll No: 46****Batch: B****Date: 05/05/2022****Experiment No.: 8****Aim**

Write a shell script program to find a number odd or even.

Procedure

```
echo "Enter the number you want to check : "  
read number  
m=$((number%2))  
if [ $m -eq 0 ]  
then  
echo "The given number is even"  
else  
echo "The given number is odd"  
fi
```

Output

```
student@S46:~/Documents/Shell Scripting$ ./oddeven.sh  
Enter the number you want to check :  
56  
The given number is even
```
