NETWORKING & SYSTEM ADMINISTRATION LAB

Experiment No.: 13

Name: Swetha Prakash

Roll No: 46

Batch: B

Date: 09/05/2022

Aim

Write a shell script program to find the factorial of a number.

## Procedure

```
echo "Enter a number"

read num

fact=1

for((i=2;i<=num;i++))

{

  fact=$((fact * i))  #fact = fact * i

}

echo "The factorial of $num is : " $fact
```

Output
